ORDER APPROVING CHANGES IN THE PLACE OF USE  
AND PURPOSE OF USE AND AMENDING THE PERMIT

WHEREAS:

1. Permit 19573 was issued to Ernest and Doris Young, and James and Mary Fattig "A Partnership" on July 12, 1985 and Permit 18291 was issued to Ernest Young and James Fattig on June 16, 1981.
2. A petition to expand and consolidate the places of use have been filed with the State Water Resources Control Board.
3. The Board has determined that the petitioned changes do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.

NOW, THEREFORE, IT IS ORDERED THAT:

1. Paragraph 4 of this permit regarding the place of use is amended as follows:

Domestic Use: Within SE $\frac{1}{4}$  of SE $\frac{1}{4}$  of Section 11, and SW $\frac{1}{4}$  of SW $\frac{1}{4}$  of Section 12, both within T6N, R5E, HB&M.

Irrigation Use: On a total of 53 acres, as follows:

20 acres within SW $\frac{1}{4}$  of SW $\frac{1}{4}$  of Section 12, T6N, R5E, HB&M  
33 acres within SE $\frac{1}{4}$  of SE $\frac{1}{4}$  of Section 11, T6N, R5E, HB&M

2. Paragraph 3 of this permit regarding purposes of use is amended to read as follows:

Domestic and Irrigation

3. Paragraph 12 of this permit is deleted. A new paragraph 12 is added as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

4. Paragraph 16 is added to this permit as follows:

Permittee shall install and maintain separate in-line totalizing flow measuring devices to record diversions from the spring under this permit and the stream under Permit 18291. The measuring devices shall be acceptable to the Board and installed not later than January 1, 1988. Records of monthly flows shall be maintained by the permittee and the amounts reported to the Board annually in the "Progress Report by Permittee".

7. Construction work shall begin within two years of the date of this permit and shall thereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted, this permit may be revoked. ✓ 0000007

8. Construction work shall be completed by December 1, 1988. ✓ 0000008

9. Complete application of the water to the authorized use shall be made by December 1, 1989. ✓ 0000009

10. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until license is issued. ✓ 0000010

11. Permittee shall allow representatives of the State Water Resources Control Board and other parties as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. ✓ 0000011

12. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation. The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. ✓ 0000012

13. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. ✓ 0000013

14. This permit shall not be construed as conferring upon the permittee right of access to the point of diversion. ✓ 0000014

15. The equivalent of the continuous flow allowance for any 7-day period may be diverted in a shorter time, provided there be no interference with other rights and instream beneficial uses; and provided further that all terms or conditions protecting instream beneficial uses be observed. ✓
